

Glatz's Black Angus

16th Cattleman's Bull Sale

• Wednesday 15 February 2023 at 11:30am •
Avenue Range, SA

Black Angus Geddes R605 – sold to Goolagong Angus in 2022 for \$38,000.

Varilek **GEDDES** 7068

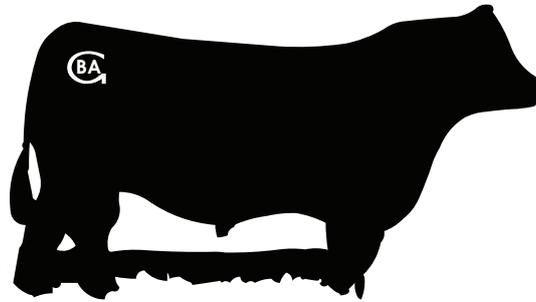

“Black Angus currently has the greatest number of Varilek Geddes progeny in Australia. Unfortunately, Geddes is now deceased with his semen unavailable. He is a sire that achieves the right balance of data and phenotype. His calves are easily born from heifers, are structurally sound and exhibit lots of early growth. He currently sits inside the Top 30% of the Angus breed for 10 recorded traits.”

DISCLAIMER

Whilst all due care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors nor the selling agents or the representative(s) thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information in this sale catalogue.

Welcome

We invite you to attend our 16th annual Cattleman's Bull Sale for 2023.

We would like to graciously acknowledge the support and success of our 2022 bull sale.

Here at Glatz's Black Angus, we offer problem free bulls, brand marketability, consistency, post-sale service and industry-grade acclaim. Glatz's cattle continue to stand at the very forefront of beef production. Leading the way in both grass and grain-fed carcass competitions, weaner sales, AuctionsPlus sales and visually appraised competitions. These are sound reasons why cattle breeders look to Glatz's Black Angus.

A team of 10 pure Glatz bred steers have been victorious in the Southern Grainfed Carcass Classic. This team were the highest scoring entry for Feedlot Performance, Carcass Quality and Overall Grand Champion team. All entries in the competition were grain fed for 120 days at Teys Charlton Feedlot and processed at Teys Australia's Naracoorte plant.

It has been our long-term laser focus to breed Angus cattle with extra muscle, weight and robustness which sets Glatz's Black Angus bulls apart. Glatz sired cattle are fast-growing, efficient and consistent; ideal for the lucrative 300kg-350kg premium carcass weight MSA grids.

Glatz bulls can advance your self-replacing female herd. For generations, there's been no compromise made on fertility and production traits such as scrotal size, milk, and docility. Selection for type and structural conformation are always part of breeding decisions.

Our cattle are endorsed by generations of deliberate breeding objectives, driven by Profitability, Predictability and Purpose, resulting in Problem Free Angus bulls.

All Glatz bulls are backed by an industry leading 3 YEAR Guarantee.

In the instance of bull breakdown or misadventure, we provide immediate service and backup.

This sale catalogue incorporates a group of Stoney Point Angus bulls. As a result of fire our 2023 sale bull numbers were impacted. Ben personally selected a quality group of bulls from the Stoney Point herd and they have been grown forward at Black Angus. Thanks to Perry, Peter and the team for such a generous gesture.

The 85 bulls catalogued for our 16th Cattleman's Bull Sale represent all that we stand for in breeding profitable Angus cattle.

We invite your inspection at the SA Beef Week Field Days, from 9.30am on Sale Day, or at any other time by appointment.

This sale will be interfaced with AuctionsPlus. Video footage will be available for all lots along with live online bidding and audio streaming.

We look forward to seeing you at our sale, Ben and Samantha Glatz.

Sale Information

SALE TIME

The sale is scheduled to commence at 11:30am SA daylight saving time on Wednesday 15th February, 2023. Inspections are welcome from 9:30am on Sale Day or at any other time by appointment.

ONLINE BIDDING

The sale will be interfaced with AuctionsPlus. Videos will be available along with live online bidding and audio streaming.

SA BEEF WEEK

All bulls catalogued for the sale will be available for inspection at SA Beef Week. Monday, 6th February 2023, on property, Avenue Range, SA.

SEMEN TESTING

All bulls catalogued for this sale have passed semen testing criteria, conducted by Nationwide Artificial Breeders. Contact Drew for further information – 0428 925 255.

BULL INSURANCE

Buyers are reminded that any purchases become their responsibility from the fall of the hammer. We strongly recommend that all bulls are comprehensively insured until conclusion of their first mating season.

GENETIC TESTING

All animals catalogued for sale with reasonable likelihood of possessing a copy of the recessive gene for Arthrogryposis Multiplex (AM), Neuropathic Hydrocephalus (NH), Contractural Arachnodactyly (CA) or Developmental Duplication (DD) have been DNA tested to determine their genetic status. The genetic status of every animal is clearly marked in this catalogue.

AMF, NHF, CAF, DDF = Tested Free.
AMFU, NHFU, CAFU, DDFU = Free based on pedigree, but untested.

AMC, NHC, CAC, DDC = Tested Carrier

If you have any questions in relation to genetic testing, please feel free to discuss them with us.

HERD HEALTH

All bulls have been vaccinated and boosted with 7in1 and Pestigard. Furthermore all sale bulls have been treated with Mineral Solutions, Swish and will be drenched prior to sale. All breeding age females are vaccinated with Pestigard and 7 in 1 annually.

BIOSECURITY

Glatz's Black Angus hold current status of J-BAS 6.

THE GLATZ'S BLACK ANGUS GUARANTEE

All Glatz's Black Angus bulls are backed by a 3 YEAR GUARANTEE. In the event of a bull proven to be infertile or incapable of natural service the vendor can either offer a suitable replacement if available or issue a credit for future sales. The credit is a pro-rata value of the bull minus the salvage value. The guarantee can only apply if the bulls incapacity is not caused by injury or disease since taking delivery. Any claim must be accompanied by a relevant veterinary certificate. The vendor retains the right to obtain independent veterinary confirmation of any claim. GBA guarantee immediate service and back up if required.

STOCK HANDLING

Glatz's Black Angus cattle are always handled with utmost patience and due care. Mustering is generally undertaken with 4 wheel motorbikes. The bulls have been exposed to working dogs.

SEMEN MARKETING RIGHTS

The semen marketing rights for specific lots in this catalogue are to be retained by the vendor. Alterations to these conditions can be negotiated with the vendor prior to the sale.

DELIVERY

The vendor will personally deliver as many of the sale lots as possible, free of charge, to your property. These arrangements can be made after the sale.

REBATE

A 3% rebate is offered to outside agents introducing buyers to the selling agent prior to the sale and settling within 7 days. Outside agents must attend the sale to be eligible.

PHONE BIDDING

Phone bidding will be available for the sale. For further information contact Trevor Wiseman 0427 237 369.

CATERING

Catering and refreshments will be available before and after the sale.

COVID-19

The Sale and Beef Week Field Day will adhere to any relevant Covid-19 regulations. On property inspections are welcome anytime. The sale is interfaced with AuctionsPlus. Video footage will be available along with live bidding and audio streaming.

QR CODES

The QR codes in this catalogue can be scanned with your mobile device to play video material of the animal.

Docility Data

the

“King of Bull Selection”

Docility is considered the most important bull selection criteria by Australian cattle producers.

A survey was conducted during May and June 2019, by an independent market research group as part of an MLA Donor Company and Angus Australia co-funded project. In a key component of the survey, participants were asked to rate the importance of a range of traits and information that are available to select bulls. This survey was primarily undertaken to produce baseline values in which to gauge practice and attitude change over a 5-year period to 2023, when a second quantitative survey will be undertaken.

The data represents over 1,000 Australian beef producers, 406,000 head of beef cattle and 108 different breeds and their crosses.

Given the known implications that poor temperament poses, to both individual bulls, and to the wider herd through its progeny – the importance producers give this trait is well placed.

The benefits of good temperament (i.e. docility) are widely documented and acknowledged within industry. These include lower production costs, easy handling and reduced damage, injury and OH&S risk. Performance is also expected to be superior in environments such as feedlots, during situations such as trucking and result in better eating quality with decreased risk of dark cutting at slaughter.

The long-term impact of temperament is realized through its moderate heritability as a trait, similar to yearling weight. With a bull's substantial genetic influence on a herd – selecting for described docility genetics which enter the herd is therefore paramount. For Angus bulls, this is available as the Docility Estimated Breeding Value (EBV), which is produced from the Trans-Tasman Angus Cattle Evaluation (TACE). The Docility EBV is based on Docility scoring – collected through yard or crush assessment conducted at weaning.

Fortunately, docility has no known, strong antagonistic genetic relationship with other production or management traits. This means many bulls can be identified that have high Docility EBVs as well as meeting expectations of other breeding objective traits, such as calving ease, weight, fertility or carcass quality.

“Scoring and selection for positive docility has been a mandatory part of the Glatz's Black Angus breeding program for 23 years. TACE EBV's along with actual Docility STAR Ratings are displayed on all sale bulls.”

DOCILITY ST★R RATING

“Farm safety is no laughing matter. For your own protection and that of your employees, docility data needs to be a factor in your selection”
Ben Glatz

Glatz’s Black Angus continues to be an industry leader regarding the assessment of docility. All bulls catalogued for this 2023 Cattleman’s Bull Sale are offered with a 1-5 ST★R Rating for docility along with Breedplan Docility EBV’s.

Docility in beef cattle is an extremely heritable trait that is regularly overlooked when making breeding decisions. Cattle that possess unacceptable temperament qualities are not only a danger to handle, but are regularly at the lower end of performance in any environment and are considerably more unreliable in regard to carcass quality.

Black Angus remains to be extremely diligent in its genetic selection for bloodlines that do not threaten the general docility of our herd. Unfortunately, there is still a perception in the wider market place that Angus seedstock producers need to pay a little more attention to docility. If this is the case, we as bull providers to the commercial industry must address the situation.

The DOCILITY ST★R RATING for every bull is the result of stringent recording of its behaviour when placed in various pressure situations. The scoring has been conducted a number of times by independent and in herd personnel. All scores for each bull have then been tabulated to determine an average DOCILITY ST★R RATING ranging from 1 – 5 STARS.

“Please remember that Glatz’s Black Angus refuses to offer any bull for sale that is considered to display unacceptable temperament characteristics”

- DOCILITY ST★R RATING

★★★★★

Extremely docile. No movement or stress is expressed when confined.
- DOCILITY ST★R RATING

★★★★

Shows minimal stress when confined. Minimal intermittent movement.
- DOCILITY ST★R RATING

★★★

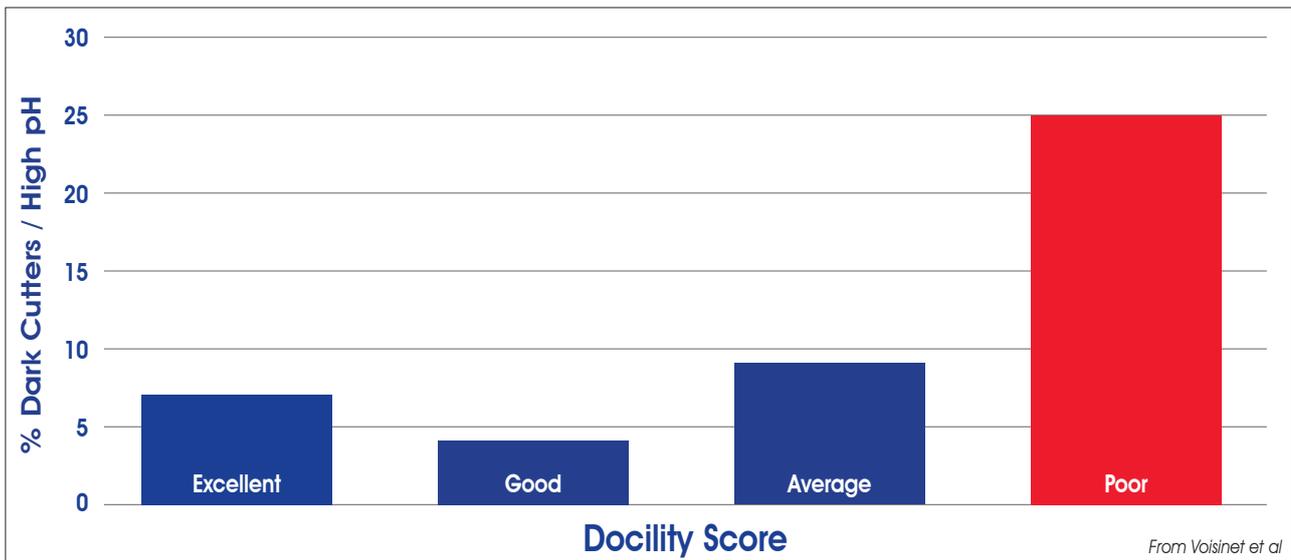

More regular movement whilst confined. Some tail twitching.
- DOCILITY ST★R RATING

★★

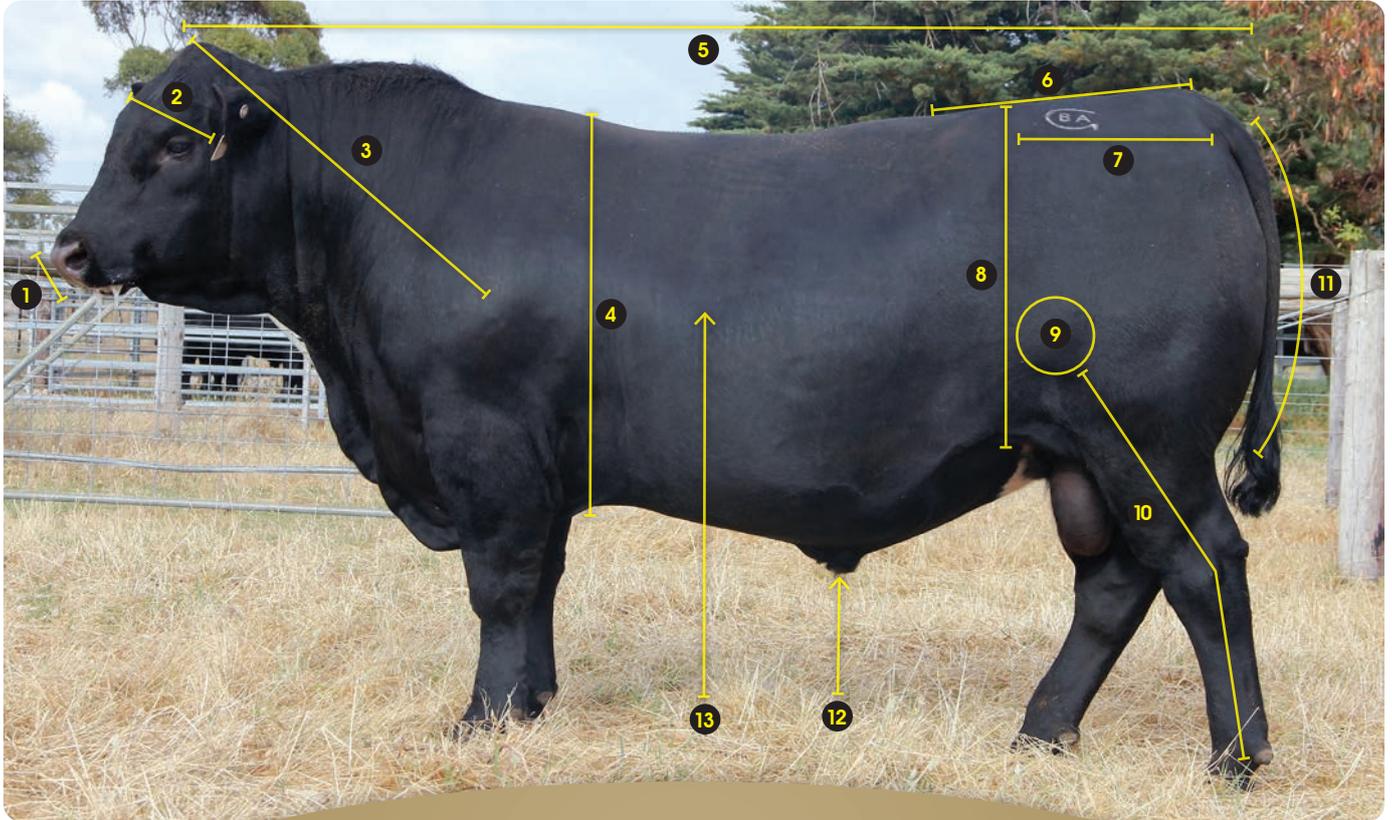

Constant movement whilst confined. Tail twitching. Some jumping in crush.
- DOCILITY ST★R RATING

★

Snorting, jumping, extremely tense. Rapid exit from crush.

“The Ideal Beef Bull”

“A beef animal needs to be sound structured and free in locomotion whilst displaying quality of type. Adhering to these criteria, with some support of performance data (EBV’s) when selecting bulls is best practice. Such practice will reward the profitability and sustainability of your beef breeding business.”

1. Muzzle/Jaw

A wide muzzle and prominent bottom jaw are desirable. These are essential for an animal to forage efficiently. The bottom jaw needs to be prominent from a front view.

2. Head

Width across the eyes can indicate the overall dimension of the animal. A long narrow head is generally attached to a tall and narrow animal. A particularly short and wide head is generally attached to a more moderate animal. Hooding over the eye for protection is favorable.

3. Head Carriage

Well-structured and free moving animals naturally carry their head in a somewhat elevated fashion. In a relaxed stance, these animals can comfortably maintain their ear level equal to or above the top of their shoulder.

4. Chest/Girth

The engine room. Most of the major organs are beneath. A full and deep chest/girth is a true indicator of an animal’s constitution and it’s ability to maintain good condition. The chest/girth should blend into the animal’s dimension, not as a division between the front and rear.

5. Body Length

Length of body increases weight on the scales. Heavy and well-balanced cattle have extra length across all thirds. Nose to shoulder. Shoulder to hip. Hip to pin.

6. Tail Set

A neat tail set is not just an aesthetic preference. A correct tail set should finish off the spine smoothly with minimal deviation, up or down. Higher and more prominent tail sets often coincide with high pin bones, resulting in harder calving females.

7. Hip to Pin

Cattle that are longer and angled correctly from hip to pin have more reproductive area. An angle that is close to level from hip to pin is ideal. A sloping angle from hip to pin is preferred over an increasing angle. It’s not easy for a cow to push a calf up hill.

8. Depth of Flank

The depth of an animal from the hip down to it’s flank is a true indicator of it’s fleshing ability, constitution and dimension. Animals that cut up high in the flank can be harder doing, leaner and not as maternal.

9. Stifle

Bulging of the stifle muscle is an indicator of how much true muscle is within an animal. Heavily muscled bulls when examined from behind exhibit their widest point at the stifle.

10. Rear Legs

Rear leg structure is one of the most critical aspects of working bulls and functional females. Post Legged/Straight Legged bulls have a far greater risk of stifle breakdown and arthritic side effects which often co-inside with steep pastern angle. The ideal skeletal angle from stifle-hock-pastern is around 140 degrees. As this angle becomes straighter with post legged animals, their freedom of movement, suspension in movement and length of stride are compromised.

11. Butt Shape

Roundness of butt is a good indicator of muscularity in bulls. Heavier muscled bulls have an even curve that starts at the pins and continues down deep into the thigh. Lighter muscled bulls will express a straighter curve that does not fill deep into the thigh, regardless of condition. From behind, heavier muscled bulls are widest at the stifle and full between the legs. Lighter muscled bulls are widest at the hips and become narrower down to the thigh.

12. Sheath

Broken penises are the most common breakdown in working bulls. Selecting bulls with tighter and less pendulous sheaths can provide some defense against this. Bulls with tighter and less pendulous sheaths generally have more control during service and are less prone to sheath damage and infections.

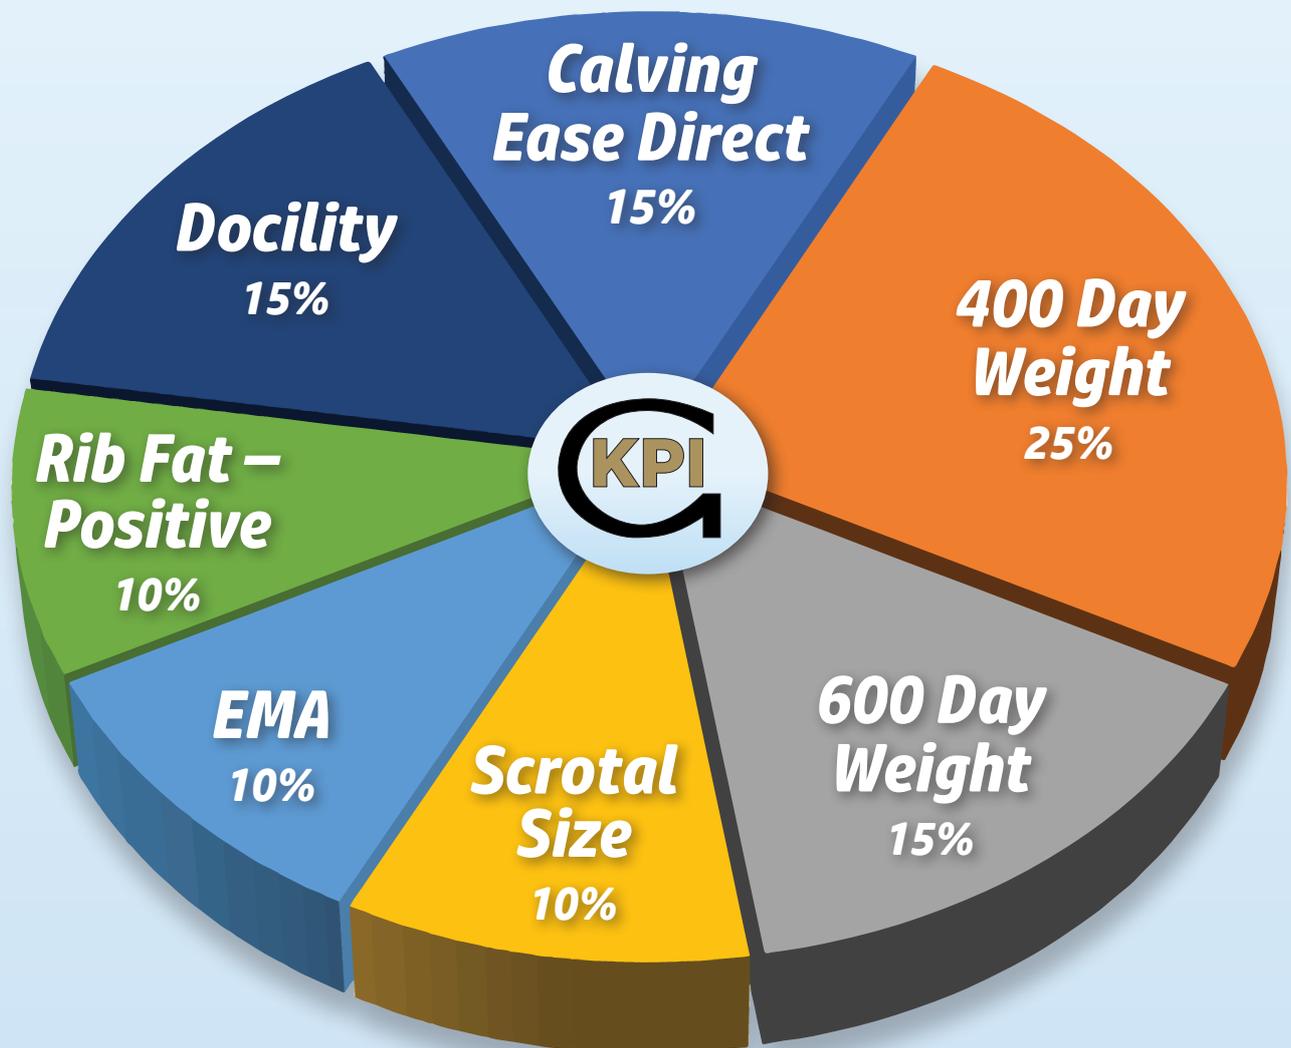

13. Hair Type

Slick, fine hair is more desirable than coarse and sometimes curly hair. Desirable hair type will often correlate to cattle that maintain good health and condition. Slick coated cattle will always present to their best at point of sale.

Glatz's

KPI

Key
Performance
Indicators

Glatz's "KPI" is an innovative 'EBV Only' analysis. The KPI formula has been developed in house at Black Angus and describes the sale bulls purely from an EBV standpoint. The key individual traits are combined with each individual trait's level of influence therefore establishing a total KPI value.

The KPI rates all bulls based on the EBV traits of most economic influence to Glatz's southern Australian based clientele. Self-replacing weaner producers whose calves are finished on grass or 120 day grain.

Glatz's KPI specifically targets the profitability traits of its commercial cattle clients.

Note – Specific EBV's need to be considered when selecting bulls for heifer joining. We recommend Calving Ease Direct (CED) as the number one EBV of importance with some support from Birth Weight (BW) and Gestation Length (GL).

Reference Sires

Baldridge 38 Special (USA)

- * Top 5-8% of the breed for 200 Growth, 400 Growth and 600 Growth
- * Top 5-8% of the breed for Calving Ease Direct and Calving Ease Daughters
- * Foot Structure Improver

Varilek Geddes (USA)

- * Calving Ease
- * Low Birth Weight
- * Top 30% of the breed for 10 individual traits

Black Angus Jonah Lomu P229

- * Top 3-7% of the breed for 200 Growth, Docility, Calving Ease Daughters and Carcase Weight
- * Top 9-12% of the breed for 400 Growth and 600 Growth
- * Impressive Calving Ease Sire

Baldrige 38 Special progeny have been smashing sales Australia wide. We are expecting our 4th consecutive drop of his calves at Black Angus this year. He was heavily researched and selected for his balance of Calving Ease, Explosive Growth, Moderate MCW, High EMA and exceptional Foot Data. His calves at Black Angus are easily born, fast growing, good footed and are particularly well muscled. His young daughters are now in production, having neat udders and raising heavy weaners. 38 Special is positioned near the top of the Angus breed for CED, CEDtrs, Low Birth Weight, 200 Growth, 400 Growth, 600 Growth and Milk. His semen is currently unavailable in Australia.

Makahu is owned by Black Angus with a \$20,000 half share sold to Mandayen in 2020. He has become one of Australia's go-to reliability semen sires being marketed by Agrigene. All breeders that either inspect him or his progeny in the flesh use him. Then use him again and again. He is super sound and super docile in a large, thick and athletic frame. He has been utilised for heifer mating year on year. 156 recorded progeny at Black Angus so far.

Black Angus Complement L51 "Selwood" appeals to the majority of cattle breeders. The hot demand for his sons in recent years confirms his industry relevance with 120 proven progeny at Black Angus alone. He ranks at the Top 1% of the Angus breed for Positive Rib Fat, Positive Rump Fat and Docility. Top 2-6% for Low Birth Weight, Milk, Calving Ease Daughters and Days to Calving. He and his namesake are legends.

A Geddes son topped our 2022 sale selling to Goolaging for \$38,000. Geddes S31 is the start of a super run of Geddes sons for 2023. His wonderful dam produced Lot 2 in 2021 selling to Millanda Estate for \$18,000. Her 'R' drop heifer is the pick of her group. Geddes S31's grand dam produced 7 natural calves including feature bulls in 2015 and 2016. His great grand dam raised 13 natural calves. She was in the pedigree of 4 of the first 9 sale bulls in 2021. Nothing more to say! Semen marketing rights retained. (Refer to P3.)

38 Special progeny are smashing sales Australia wide. Alpine sold a 38 Special son for \$120,000 and a yearling 38 Special daughter topped the recent Stoney Point female dispersal. 38 Special S50 exhibits extra frame with a clean and well extended front end. He stands on excellent feet. His young K11 dam is case in point of how well these K11 daughters breed. His grand dam was a beautifully made and correct female producing 8 natural calves. Semen marketing rights retained. (Refer to P3.)

Wattle Street S37 ranks #3 for Glatz's KPI in the catalogue. The first ever Black Angus Wattle Street Q127 son to sell. His progeny will impress proper cattlemen who appreciate cattle with grunt. BA Wattle Street Q127 breeds tremendous growth, shape, sound structure and docility. Mountain Valley Angus / Poll Herefords purchased a \$15,000, 50% share in him as a yearling. He sits in the Top 1-4% of the breed for 200 Growth, 400 Growth, 600 Growth, Days to Calving, Carcase Weight, EMA and Docility. Boom!

Makahu S72 is the #7 ranked bull for Glatz's KPI in the sale. The legendary Cat, Harry Taylor outplayed most key forwards wearing #7 for The Cats! S72 ranks in the Top 5-19% of the breed for 200 Growth, 400 Growth, 600 Growth and Scrotal Size. Suitable for heifer joining. We have a full natural sister to this bull. She recently weaned a cracking calf and is lining up for another.

The dam of this bull, BA Dream J79 featured strongly in the pedigree of Waitara's \$110,000 record priced yearling bull in 2022. The influence that J79 has made in our own herd has been phenomenal. This Makahu son of hers will breed foundation females for sure. Sound, maternal and productive. Makahu S100 ranks inside the Top 25% of the breed for 400 Growth, Milk, Scrotal and Docility.

 S88 ranks #15 in the sale for Glatz's KPI. If anyone thinks the bull breeding caper is easy - think again. Wattle Street S88 was ridden so badly by his peers as a yearling that he had almost no hair from his hip back. And John Farnham is known as the come-back king. Not now! S88 ranks in the Top 5% of the breed for Docility. Top 13-24% for 200 Growth, 400 Growth, 600 Growth, Scrotal, Carcase Weight and EMA.

Selwood S131 could be the last BA Selwood son to sell at Black Angus and he has a story. A Lucindale based fancier of fine automobiles purchased a full brother to S131 in 2020. He had never used an Angus bull prior. His alternate coloured heifers calved extremely well. Calving his heifers had never been so easy. The same fancier purchased a full natural brother in 2021. What are the chances of him returning to make it a trifecta of full siblings?

Black Angus Cleopatra P241*

*Lot 16
Black Angus Wattle Street S97*

BLACK ANGUS **Wattle Street** Q127

“Black Angus Wattle Street Q127 is a Proper Beef Bull. Super Sound, Super Docile, Super Thick and Heavy. His first run of sale bulls are Super Impressive. Just how we like them. Cattle that make our commercial clients money. Wattle Street Ranks in the Top 1% of the breed for Docility, Foot Angle and Carcase Weight. Top 3% for 400 Growth, 600 Growth, EMA and Foot Claw Shape.”

Mineral Solutions

“Enhance”

“Advanced liquid mineral formulation tailored to enhance the health, performance and reproduction of beef and dairy cattle”

Typical Analysis

Copper	Zinc	Manganese	Cobalt	Magnesium	Selenium	Sulphur
8000mg/L	7000mg/L	6000mg/L	4000mg/L	3000mg/L	1000mg/L	17000mg/L

***Fulvic Acid is added to this product as a natural electrolyte source and chelating agent for enhanced mineral delivery and utilization by the animal.**

Dosage – 10ml/100kg bodyweight. *Do not exceed the maximum dose rate of 50ml/animal.

Dosage Frequency – ‘Mineral Solutions’ can be added at the recommended dose rate, to trough water or feed sources including hay and grain. Best results will be achieved with 30-45 day dosage intervals.

“De-Stress”

“Advanced liquid mineral formulation to minimise the stress of cattle during Weaning, Pre-Transport, Pre-Slaughter and for induction to Ration Feeding.

Typical Analysis

Copper	Zinc	Manganese	Cobalt	Magnesium	Sulphur
2000mg/L	1750mg/L	1500mg/L	1000mg/L	5000mg/L	5500mg/L

***Fulvic Acid is added to this product as a natural electrolyte source and chelating agent for enhanced mineral delivery and utilization by the animal.**

Dosage – 10ml/100kg bodyweight applied during *Weaning *Pre-Transport

*Pre-Slaughter *Induction to Ration Feeding

Mineral Solutions “De-Stress” can be added at the recommended daily dosage to trough water or feed sources such as hay and grain.

For further information/enquiries/orders contact Ben 0407 712 455

Black Angus Makahu R95

Sold to Hewitt Cattle Australia in 2022 for \$26,000

Black Angus Makahu R5

Sold to Knowla Livestock in 2022 for \$28,000.

GLENOCH JK Makahu M602

“Makahu is owned by Black Angus with a \$20,000 half share sold to Mandayen in 2020. He has become one of Australia’s go-to reliability semen sires being marketed by Agrigene. All breeders that either inspect him or his progeny in the flesh use him. Then use him again and again. He is super sound and super docile in a large, muscular and athletic frame. He has been utilised for heifer mating year on year. 156 recorded progeny at Black Angus so far.”

Understanding Estimated Breeding Values (EBVs)

Estimated Breeding Values (EBVs) are predictions of an animal's genetic merit, based on available performance data on the individual and its relatives. EBVs are expressed in the units of measurement for each particular trait. They are shown as +ive or -ive differences from the breed base. As the breed base is set to a historical benchmark, the average EBVs of animals in each year drop has changed over time as a result of genetic change within the breed. The current breed averages are shown below. These averages provide a useful benchmark for comparing EBVs for animals.

MID DECEMBER ANGUS BREEDPLAN

	Calving Ease		Birth		Growth				Fertility			Carcase					
	CEDir	CEDtrs	GL	BW	200	400	600	MCW	Milk	SS	CWT	EMA	RIB	P8	RBV	IMF	DOC
Brd Avg	+1.8	+2.3	-4.6	+4.2	+49	+89	+116	+100	+17	+2.1	+65	+6.2	-0.1	-0.4	+0.5	+2.1	+20

*Breed average represents the average EBV of all 2021 drop Angus and Angus influenced animals analysed in the Mid-December 2022 Trans Tasman Angus BREEDPLAN genetic evaluation.

CALVING EASE TRAITS

Calving Ease (DIR): estimate of genetic differences among animals in the ability of their calves from 2 year old heifers to be born unassisted. Higher, more +ive, Calving Ease (DIR) EBVs are more favourable.

Calving Ease (DTRS): estimates of genetic differences among animals in the ability of their 2 year old daughters to calve without assistance. Higher, more +ive, Calving Ease (DTRS) EBVs are more favourable.

Gestation Length: estimate of genetic differences among animals in the number of days from the date of conception until the calf birth date. Lower, or more -ive, Gestation Length EBVs are generally more favourable.

Birth Wt: estimate of genetic differences between animals in kg of calf birth weight. Calf birth weight is the biggest contributing factor causing calving difficulty in heifers. While low Birth Wt EBVs are favoured for calving ease they are also often associated with lower growth potential. Small, or moderate, Birth Wt EBVs are more favourable.

FERTILITY TRAITS

Days to Calving (DC): estimate of genetic differences among in female fertility, expressed as the number of days from the start of the joining period until subsequent calving. Females with shorter DC EBVs tend to commence cycling earlier after calving and conceive earlier in the joining period. They also tend to attain puberty at a younger age as heifers. Lower, or more -ive, Days to Calving EBVs are more favourable.

Scrotal Size: estimate of the genetic differences among animals in scrotal circumference at 400 days of age. Increased scrotal size is associated with increased semen production in bulls, and earlier age at puberty of bull and heifer progeny. Larger, or more +ive, Scrotal Size EBVs are more favourable.

GROWTH TRAITS

200-Day Wt: estimate of the genetic differences among animals in weight at 200 days of age. This is a measure of an animal's early growth to weaning. It is an important trait for breeders turning off animals as vealers or weaners.

400-Day Wt: estimate of the genetic differences among animals in weight at 400 days of age. This is an important trait for breeders turning off animals as yearlings.

600-Day Wt: estimate of the genetic differences among animals in live-weight at 600 days of age. This is an important trait for breeders targeting the production of animals suited for heavy weight grass finished or grain fed market

MATERNAL TRAITS

Milk: estimate of the genetic differences among animals in milk production potential, expressed through variation in calf growth performance. Larger, more +ive, or moderate, Milk EBVs can be more favourable, depending on the environment.

Mature Cow Wt: estimate of the genetic differences among animals in cow weight at 5 years of age.

CARCASE TRAITS

Carcase Wt: estimate of the genetic differences among animals in hot standard carcass weight at 750 days of age. Larger, more +ive, Carcass Weight EBVs are more favourable.

EMA: estimate of the genetic differences among animals in eye muscle area (cm²) at the 12/13th rib site on a 400kg carcass. Larger, more +ive, EMA EBVs are generally more favourable.

Rib Fat: estimate of the genetic differences among animals in fat depth (mm) at the 12/13th rib site, measures on a 400kg carcass. More positive (+ive), or more negative (-ive), Rib Fat EBVs may be more favourable, depending on your breeding goals.

Rump Fat: estimate of genetic differences among animals in fat depth at the P8 rump site on a standard 400kg carcass. More positive (+ive), or more negative (-ive), Rib Fat EBVs may be more favourable, depending on your breeding goals.

IMF%: estimate of genetic differences among animals in percentage intra-muscular fat (marbling) in a 400kg carcass.

TEMPERAMENT TRAITS

Docility: estimate of genetic differences between animals in temperament. Docility EBVs are expressed as differences in the percentage of progeny that will be scored with acceptable temperament (ie. either "docile" or "restless"). Higher Docility EBVs are more favourable.

TRAITS OBSERVED

Indicates the traits that have been recorded for a particular animal and are contributing to the EBVs that have been calculated. These will appear directly below the table displaying the animals EBVs.

Honour Roll

2021

Southern Grainfed Carcass Classic

- Highest Scoring Feedlot Performance Team
- Highest Scoring Carcass Quality Team
- Grand Champion Team
- Bred and exhibited by GBA client; HL Robertson, Kingston, SE.

2020

Southern Grainfed Carcass Classic

- Highest Scoring Carcass Quality Team
- Overall 3rd Highest Scoring Team combining Feedlot Compliance, Feedlot Performance and Carcass Quality
- Bred and exhibited by GBA client; HL Robertson, Kingston, SE.

2019

Royal Melbourne Show, Angus Centenary Feature Show

- Champion Pure Bred Angus Steer – Glatz's Black Angus

Sydney Royal Easter Show, Angus Centenary Sale

- Highest priced unjoined female sold by Glatz's Black Angus

2018

Southern Grassfed Carcass Classic

- Grand Champion Carcass
- Reserve Grand Champion Carcass
- Best Team of 3 Animals
- Best Team of 10 Animals
- Bred and exhibited by GBA client; David & Jenny Smith, Kalangadoo, SA

Class 1 180-240kg cw

- First Place
- Bred and exhibited by Glatz's Black Angus

2017

MSA Excellence in Eating Quality Award

- Most Outstanding South Australian Beef Producer
- Pure Glatz's Black Angus genetics

2015

Southern Grassfed Carcass Classic

- Reserve Champion Carcass
- 1st Place & 4th Place 180-260kg cw
- 1st Place & 3rd Place 261-340kg cw
- **180-260kg cw**
2nd highest MSA Marble Score Lowest and Second Lowest pH
- **261-340kg cw**
Highest and Second Highest Eating Quality Points
Highest and Second Highest MSA Index
Highest MSA Marble Points
Lowest pH

All bred and exhibited by Glatz's Black Angus

SA Stud Beef Field Days, Anz Heifer Challenge

- Champion Pen - Glatz's Black Angus

2014

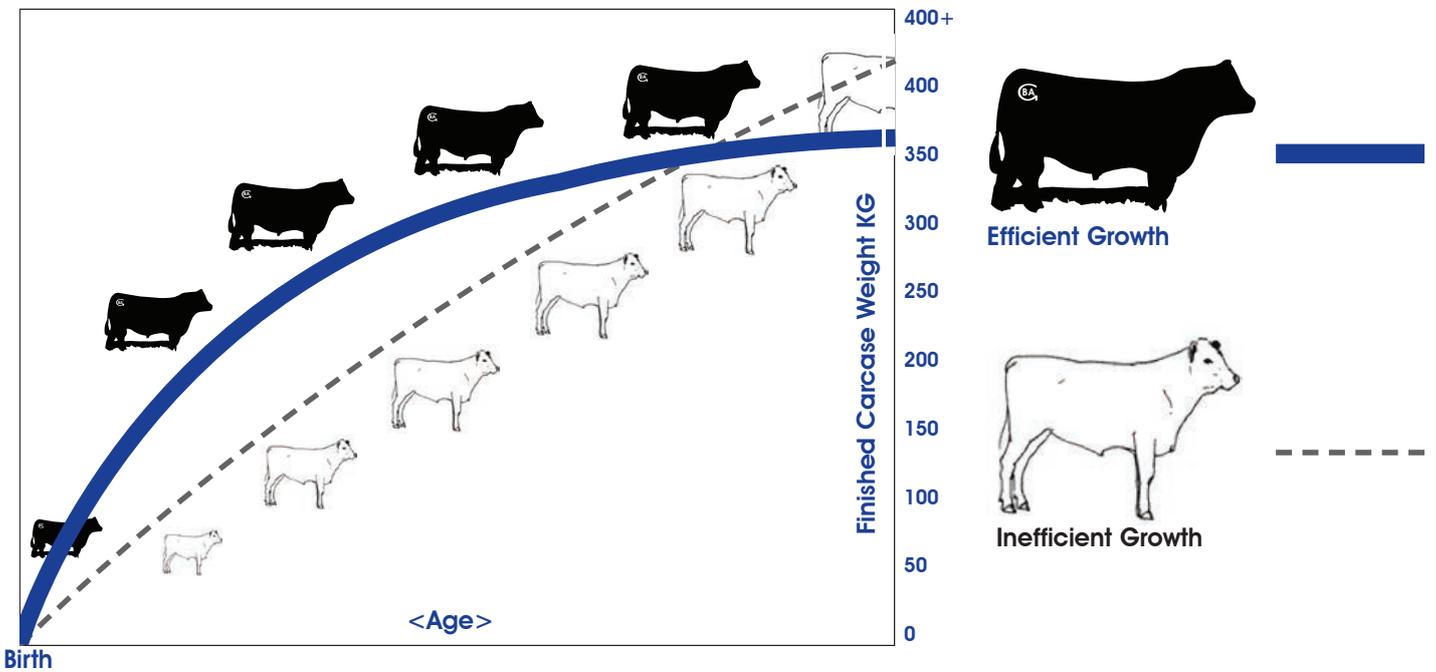

Southern Grassfed Carcass Classic

- Grand Champion Carcass - Bred and exhibited by GBA clients; P&P Holmes, Drik Drik, Vic

SA Stud Beef Field Days, Anz Heifer Challenge

- Champion Pen - Glatz's Black Angus

Lot 3 – Black Angus 38 Special S50

BALDRIDGE 38 SPECIAL

“Baldrige 38 Special progeny have been smashing sales Australia wide. We are expecting our 4th consecutive drop of his calves at Black Angus this year. He was heavily researched and selected for his balance of Calving Ease, Explosive Growth, Moderate MCW, High EMA and exceptional Foot Data. His calves at Black Angus are easily born, fast growing, good footed and are particularly well muscled. His young daughters are now in production, having neat udders and raising heavy weaners. 38 Special is positioned near the top of the Angus breed for CED, CEDtrs, Low Birth Weight, 200 Growth, 400 Growth, 600 Growth and Milk. His semen is currently unavailable in Australia.”

All in the one brand...

* Problem Free Bulls * Proven Performance * Proven Carcase Quality
